

Full Service Acidizing/Pumping
Company Serving the Permian Basin

Background

Acquire Oilfield Solutions was founded by Chandler Losing and Dylan Rowe, two petroleum engineers working in Midland, TX.

Acquire was founded with the ambition to provide premier full-service acidizing services and pressure pumping support across the Permian Basin. Paired with a strong safety culture, knowledge, experience, and capable equipment, we look to set the bar!

Personnel

Acquire Oilfield Solutions' entire staff is CDL licensed and HAZMAT/tanker endorsed.

The treaters/supervisors at Acquire have extensive experience in acidizing, frac, and cement, some with over 10 years field experience.

Equipment

- 2 – 1200 HHP Double Pump Units
 - 1 – 10,000 Psi & 14 BPM Max
 - 1 – 6,600 Psi & 26 BPM Max
- 1 – Trailer Mounted Hydraulic Blender Unit
- 3 – 5000 gal. Tankcon FRP acid transports
- 2 – Peterbilt Heavy Haul Trucks
- 4 – Peterbilt 379 Trucks
- 3" Ball Gun

Purpose Built Company

Acquire Oilfield Solutions was built around providing flexible acidizing solutions to clients with a wide range of pumping capabilities designed to range from low rate high pressure jobs to low pressure high rate jobs. Acquire has the capability to capture all the key data points before, during, and after a job. This information can be transmitted real-time for remote viewing. On-site pumping can be supervised from climate controlled cabins on the pumps or from provided tablets anywhere on location.

Safety

Acquire puts safety above any other aspect of our operations. From our equipment to personnel no aspect of our safety program is unaccounted for. We meet or exceed every certification and testing requirement. Acquire is a member of ISNetwork and is able to meet any other safety auditing or verification requirements.

Safe, Efficient, and Professional Pumping Services

Key Offerings

Customer satisfaction through safety-orientated, qualified personnel working with industry leading equipment is the primary goal of Acquire Oilfield Solutions. From the first-call to the rig-down, Acquire strives to provide superior service. Purpose-built equipment and strategic planning allow Acquire to put less equipment and personnel on location passing on efficiencies and cost-savings to the customer.

Crews and personnel are available 24/7 to meet any acidizing or pressure pumping requests, regardless of time or location.

Pump 1&2 – 1200HP Double Pump

Twin 10-bbl displacement tanks capable of recirculating fluid. Tanks also serve as self-contained bleed-off/pop-off system.

Birdseye view, climate controlled cabin with state of the art data acquisition software. Real-time pumping data access from anywhere in the world. Connected tablets allow job access from anywhere on location.

Industry-leading restraint system rated to 15,000psi. Restraints are inspected yearly and are insured to \$10 million by manufacturer.

Equipped w/ 110ft of 2" 1502 iron inspected yearly, 100ft of 4" suction discharge hoses, and crossovers to 1502 ranging from 2" line pipe to 5.5" casing. (300ft of iron & 200ft of hoses per unit available on request)

2 independent hydraulic systems paired with 2 centrifugal pumps and hydraulic agitators in both displacement tanks.

2-600 series SPM power-ends with separate power sources. Pump 1 has 3.5" fluid ends rated for 10,000psi and rates from 1/4 to 14 BPM. Pump 2 has 4.5" fluid ends rated for 6,600psi and up to 26 BPM.

Data / Shower Trailer

- Climate Controlled Data Van with office style seating
- MDT data acquisition allows for treater controlled job from van
- Equipped with sink, Keurig, and microwave
- ANSI certified emergency shower (420 gal cap.)
- Quiet 7kw diesel generator
- Additional desk space for company representatives (easily accessible computer/phone charging ports)
- Easy access on-location monitoring with remote capabilities

Trailer Mounted Blender & Ball Injector

Fully-independent blender driven by
Cat 3116 motor

Capable of mixing diverting agents and
other solid chemicals/products

Rigged-up on 40' flatbed capable of
hauling 15,000lbs of diverting agent or
sand

Safe, effective unit for high-rate
diversion and solid additive jobs.

Remote-controlled motor with ability to
drop balls with unparalleled accuracy

200 – 7/8" ball capacity

Acid Transports (3) 5,000gal FRP

Entire Acquire OFS staff is HAZMAT licensed, allowing for 24/7 access to acid and chemical.

Full FRP build ensures capability to transport any percentage HCl acid and most hazmat chemicals

Air-operated valves and emergency shut-down system, air unloading capability to safely and quickly unload bulk acid on location.

Andrews Yard with Acid and Chemical Dock

12,000gal of 36% HCl in yard, able to dilute to any requested percentage

3rd party lab testing of oil and water is available to create custom chemical blends for wells and projects

Diversion agents and other solid chemical additives stored at facility

Central location of yard allows for quick response across the Permian
